#### DETAILED ACTION

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1732, Examiner Leo Tentoni.

#### *Specification*

2. The abstract of the disclosure is objected to because in line 1, ``is provided'' is a phrase which can be implied and should not be used in the abstract. Correction is required. See MPEP § 608.01(b).

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: PROCESS OF MAKING MICROCREPED WIPERS.

Art Unit: 1732

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 3-6, 9, 22, 24-26 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Ostermeier (U.S. Patent 3,949,128).

Ostermeier (see the entire document, in particular, col. 1, lines 12-35; col. 5, line 66 to col. 7, line 20) teaches a process of microcreping a nonwoven web containing melt-spun fibers as set forth in the instant claims.

7. Claims 1, 3-6, 9, 15-18, 22, 24-26 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Scholz (U.S. Patent 5,498,232).

Scholz (see the entire document, in particular, col. 4, line 26 to col. 9, line 6) teaches a process of microcreping a nonwoven web containing melt-spun fibers as set forth in the instant claims.

8. Claims 1-8 and 22-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Watts (WO 99/20822).

Watts (see the entire document, in particular, pages 3, 4, 7 and 9-15) teaches a process of microcreping a nonwoven web containing melt-spun fibers as set forth in the instant claims.

**Allowable Subject Matter**

9. Claims 10-14, 19-21 and 29-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leo B. Tentoni whose telephone number is (571) 272-1209. The examiner can normally be reached on Monday - Friday (6:30 A.M. - 3:00 P.M.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael P. Colaianni can be reached on (571) 272-1196. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
